

Home Owner's Check List for B&D Smart Phone Control Kit

What you will need before installation:

WiFi Connection	You will need a connected home WiFi modem router and your WiFi login details (e.g. Username and password)
Compatible Smart device	To use the B&D App you will need a Smart Phone or Tablet using iOS 8.4 and above or Android 4.4 and above
Reliable Wi-Fi connection and power point	Your kit comes with the Smart Hub that needs to be installed within range of your home's WiFi router and connected to mains power
Mobile data enabled	To operate your door from outside of WiFi range (e.g. while you are at work), your mobile device will need to use mobile data.

During installation you will be asked to create a user name and password so that devices can be paired to the system securely.

Your username: Minimum of 3 Characters. Case Sensitive.

Your own password: Minimum of 5 Characters. Case Sensitive.

You can download the B&D App via the below QR code.
